

# Introducing Paycor®

## Our New HR and Payroll Provider

We are excited to announce changes to our payroll software that will make it easier for you to access the information you need and allow you to take care of important tasks on your own.

### What can we expect with this partnership?

While Paycor guides us through the process of importing our data and ensuring their solutions meet our needs, they will provide us with valuable setup information, training and ongoing support to maximize our experience. Paycor will help us share our progress to keep you informed from now until you are ready to move to your long term support team. **If you have any specific questions, reach out to:**

### When will things change and how will we get important information?

Paycor will produce our paychecks and you can visit their website to view your check stub. We will soon share more information on registering and creating your Paycor account. Your personal account will include your dashboard along with HR and payroll details, which can be accessed online or through the Paycor mobile app.
